A MAJORITY THAT DOES THINGS.

Congressman Underwood, democratic leader of the house, according to the Washington correspondent of the Globe-Democrat, caught the standpatters napping Thursday when the free list bill came back from the senate. He "accomplished a strategic move which surprised the republicans," confesses the correspondent.

It is by no means the first time the republicans have had just such surprises during the special session. Strength in an army, like power in mechanics, is estimated according to the military captains, by multiplying the men by their rapidity of movement. The strength of the majority in a popular assembly does not depend alone on the size of the following, any more than the strength of an army depends alone on the magnitude of the force. It is to be multiplied by something that corresponds to rapidity in the field—wisdom in appraising the value of an idea, promptness in grasping parliamentary opportunity, facility in discovering points on which discordant elements may unite.

Leaders of democratic convictions in the sixty-second congress have shown that they possess in large measure this something which, when multiplied by the factor of predominating numbers, gives an index of the efficiency of a responsible majority. The direction of the party forces at Washington has revealed a practical capacity that is gratifying not only to the rank and file of the democracy, but to the whole public. The manner in which the anti-democratic prejudices of the insurgents of both houses have been successively overcome and their votes utilized in the execution of the democratic legislative program forms by itself a series of parliamentary triumphs. The democratic leaders are men of affairs, devoting their talents and experience to the public service.

If they haven't got so used to that sort of thing by this time that they have come to expect it, more surprises are in store for them.

WAR ON IMMORAL PLAYS.

A society formed in Evanston, Ill., and pledged to support only certain forms of the drama has spread rapidly over the country. One of its aims is to encourage a higher morality in plays, but its influence is diluted because of a suspicion that it is committed to fads.

The American Federation of Catholic Societies attacks the problem more vigorously. It has discovered that "plays" have been produced which the Christian holds in the highest respect, and requests the members of its affiliated societies "not only to avoid such offensive performances, but to withdraw their patronage from any theater which lends itself to offensive productions."

Responsible theatrical producers are in accord with the Catholic clergymen. They realize that their prosperity depends on a decent theater and a wholesome drama.

Managers protest that the Catholic societies' indictment of the American stage is too sweeping. They claim that the moral tone of the theater in this country is improving. In this contention they are probably right. The letter of protest which has been sent to every theatrical producer of importance

Country Town Sayings
(By "Ed" Howe)

Every man has his list of outrages.

Be sympathetic with a man and he will usually follow you more.

A man is often forced to say: "O, that's all right," when it isn't.

What a villain a man is willing to become to "make a good trade!"

We are all outwardly more cheerful in giving than we feel inside.

I should as soon pass a funeral procession on the street as a woman in deep mourning.

When women attend a party, on the way home they have quite a little criticism to offer even if they had a good time.

All women claim proposals on bended knees, and most men say they never proposed at all; that somehow before they knew it they were engaged.

A woman says: "I would like to be rich because of the great good I could do." But there are two or three other reasons why a man would like to be rich.

When women attend a funeral, they carry two handkerchiefs, and go into the house while the men stay out in the air and smoke. No use talking; men won't behave properly.

(Copyright, 1911, by George Matthew Adams.)

cities nine plays as offensive. They are selected from productions made in the last four years which count into the thousands.

Any churlish or speculator with capital or credit may have a play produced, yet the number that actually threaten public morality is small. Their producers trade upon the morbid impulses of the public, but their success is short-lived.

The remedy for such abuses lies with the public. Without audience immoral plays cannot exist.

ARBITRATION TREATIES
GREAT STEP FORWARD.

Last week was epochal in the progress toward the elimination of warfare and replacing the resort to arms by a means of peaceful settlement. Arbitration treaties between the United States and France and the United States and Great Britain were signed and a decided step was taken toward world peace. They must be ratified by the United States senate, but although there may be some opposition to them there, the indications are that they will be adopted.

The treaties provide that differences between this country and either of the two shall be referred to the Hague tribunal, unless some other is selected or instituted. Should these differences be such that either nation deems them not to be within the jurisdiction of the tribunal, representatives of both shall be appointed to consider the matter and make recommendations as to a settlement. If they decide that it should be referred to the Hague court, it must be sent there. In any case, an effort is to be made to settle the difficulties without even resorting to the Hague. Delays of a year may be granted for adjusting such disputes by ordinary diplomatic means.

The adoption of these treaties is a matter of the greatest importance to the entire world. They will probably be followed by similar ones between the United States and other nations and between various countries, and they will pave the way for the elimination of warfare. Others between the United States and Germany, the Netherlands and Sweden, are being considered, and Japan may also be included.

Treaties are broken from time to time, it is true; such may be the case in regard to some of these, but the sentiment of the world will do much to uphold the demand to keep the nations in line regarding them. The ones just signed constitute a most important step and one over which the entire world may rejoice.

The value of the two just signed does not consist so much in the promise they give of eliminating any threat of war between the United States and the two other nations involved, as in the example that has been given other nations. Should they not be followed by others, they will not constitute the

U.S.
SENATE

A NEW BOSS.

—NEW YORK HERALD

Important departure they are considered to be, although their worth is not to be minimized in that respect.

But beyond all this is the fact that they promise to be a commencement of an era of world-wide arbitration and the gradual elimination of warfare.

The first legislature of Arizona will have a vast amount of important work to perform and in selecting candidates men should be chosen who have had some experience in government, so that the laws passed for the new state will be based on lines of practicality rather than on theory alone. Cochise county will have nine members in the legislature; Cochise county has vast industrial interests, mining, agricultural and stock, and all these interests should be guarded in the legislature with careful care. What Arizona needs now most is capital for the further development of her splendid resources. The development of mines, agricultural and stock interests means support of an increased population; without further development there can be no increase in the present population. Laws are wanted that will insure encouragement and protection of capital that will surely seek investment in the new state under favorable conditions.

NORTHERN INDIANA EDITORS. MISHAWAKA, Ind., Aug. 10.—The membership of the Northern Indiana Editorial association, of which S. D. Moffett of Elwood is president, showed up in full force here today for the association's annual summer meeting. South Bend is co-operating with Mishawaka in entertaining the visiting editors, many of whom are accompanied by their families. The business sessions of the gathering will be held tomorrow.

HOLINESS CAMP MEETING. JACKSON, Ga., Aug. 10.—The annual Holiness camp meeting at Indian Spring, one of the largest yearly assemblies of its kind held in the south, opened today and will continue until August 20. Prominent among those secured to lead the religious services this season are Rev. C. W. Ruth of Philadelphia and Dr. H. C. Morrison, president of Ashbury College, Wilmore, Ky.

LETTER CARRIERS AT QUEBEC. QUEBEC, Aug. 10.—The Federal Letter Carriers association met in Quebec for its annual convention today with delegates present from nearly every section of Canada. W. M. Burrows of Winnipeg is presiding over the sessions, which will last several days.

CONCRETE WORK ON
DOUGLAS SMELTER

Five Hundred Yards Will Finish It—Other Work Is Progressing

(Douglas International.) The concrete work at the Copper Queen smelter in connection with the additional features being built here is about completed, and it was learned today that probably five hundred yards would finish it. This construction work was begun about the first of the year and since then hundreds of cars of sand and cement have been received and with crushed slag ground into concrete in a mill provided for that purpose. How many yards of concrete have been put into foundations is not known, but it reaches a very large figure, including foundations for buildings, retaining walls and for the big stack, which took a solid block sixty feet in diameter, octagonal in shape, twelve feet thick. An idea of the scope of the concrete work required in connection with the addition of reverberatory furnaces and roasters to the Copper Queen may be had by stating that this concrete was drawn automatically from the cement mill and hauled to the place required and dumped into the excavations where it was required. The finishing of the concrete work will complete a vast preliminary undertaking and will dispense with a large amount of common laborers.

The work on the big brick stack which is to accommodate the reverberatory furnaces, taking the fumes from great dust chambers similar to those now serving the converter stands in the blast furnace building, has been delayed several times because of the non-arrival of material when it was needed to continue the work. The stack, which is to be three hundred feet high, has now reached a height of 215 feet and, of course, as it gets higher progress will be slower.

For the power house which belongs to this new addition one boiler has been received and will be promptly placed in position, the foundations for the boilers, of which there will be four, being all ready. The roaster building has been practically completed, only a small amount of work being to do yet. Nothing has been done on the high line which is to come in over the reverberatory furnaces since the grade was completed to where the steel trusses will carry the track in a circle to the reverberatories. This high line road comes from the north, where it connects with the tracks which serve all departments

of the smelter.

According to F. J. McCabe, foreman of the construction work, there yet remains a vast amount of work to be done and he can give no idea as to when completion may be expected, as that must necessarily depend on the promptness which features the delivery of required material.

When this work was begun it was estimated by the management that it might be possible to complete it during the present year, but since then there have been unexpected delays in the arrival of machinery, so that it may be possible that the job will not reach completion as soon as was originally expected or hoped for.

At the C. & A. A great deal of work has been done at the C. & A. smelter in the way of preparation for the work of constructing the new smelter plant to be constructed by that company. A great deal of grading has been done in bringing the surface to a proper level. A vast space to the southeast of the present works is being filled in with slag from the furnaces. New railroad tracks have been provided for and on the high line over which the ore is hauled to the feed floor of the furnaces several culverts have been cut in and bridged to allow any flood waters to pass without being carried into the works. With the exception of the engines in the power house, there will be little of the present works left in the new plant. The plans and location of the new plant are such as to allow the continuance of the old smelter until the new one is ready for operation. An eastern mining journal has estimated that it would probably require two years to complete the new smelter planned by the Calumet & Arizona at Douglas and that it would cost between one and one and a quarter million dollars. Andy Scott, of this city, had a number of teams working on grades and excavations at the C. & A. for several months, but this work is now all about done.

In connection with the new C. & A. smelter a stack will be built of steel to a height of 320 feet which will be twenty feet higher than the new brick stack now under construction at the Queen.

Engineer Reppeth, who is planning this new smelter, has maintained an office and corps of engineers in this city since last winter and it is understood that many of the detailed plans are now ready to be turned over to the constructors and to those who will handle the structural steel and machinery in the eastern factories.

Special 50 cent Luncheon and \$1.00 Table d'hôte dinner daily at Copper Queen Hotel.

Remedies are Needed

Were we perfect, which we are not, medicines would not often be needed. But since our systems have become weakened, impaired and broken down through indications which have gone on from the early age, through countless generations, remedies are needed to aid Nature in correcting our inherited and otherwise acquired weaknesses. To reach the seat of stomach weakness and consequent digestive troubles, there is nothing so good as Dr. Pierce's Golden Medical Discovery, a dyeretic compound, extracted from native medicinal roots—sold for over forty years with great satisfaction to all users. For Weak Stomach, Bilelessness, Liver Complaint, Pain in the Stomach after eating, Heartburn, Bad Breath, Belching of food, Chronic Diarrhea and other festal Disorders, the "Discovery" is a time-proven and most efficient remedy.

The genuine has on its outside wrapper the Signature

Dr. J. C. Pierce

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic, medicine of known composition, not even though the urgent dealer may thereby make a little bigger profit. Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take as candy.

SOUTHERN PACIFIC
FACING BIG STRIKE

(Tucson Citizen).

What may develop into one of the biggest strikes of recent years, threatening to cripple the Southern Pacific shops, is being awaited this afternoon. At any time, so it is stated, orders may be received from the union headquarters in San Francisco stating that the negotiations between the officers of the machinists' unions and those of the railroad company have resulted in failure, and ordering a general walkout.

Such an order will affect the boiler-makers, copper smiths, machinists and at least a portion of the car repairers. It is stated, and the result will be that unless the railroad is able to secure men immediately the train service will be crippled if not paralyzed through inability to keep the locomotives in running repair.

It is reported today that this evening's No. 9 will bring in three carloads of non-union machinists, who will be placed in the shops at once if the union men are ordered out. Not only have Master Mechanic Peterson and Superintendent Dyer spent a large portion of their time in the shops today, but all company foremen have been endeavoring to use their influence among the men to hold them in line.

Though the shop employees who would be affected by a strike order would be only about 150, some difficulty is feared if strike-breakers were to be put in their places. The ground which the machinists and the railroad are contesting embraces a wide range of working conditions, including a shortening of the work day to eight hours, a wage increase, transportation, over time scales, etc.

WALBRIDGE-BUFFUM. JAMESTOWN, R. I., Aug. 10.—Prominent summer residents of Newport, Narragansett Pier and the neighboring resorts turned out in full force for the wedding here today of Miss Margaret Buffum of Newport and Charles Carter Walbridge of Philadelphia. The ceremony was performed at the summer home of the bride's parents, The Rev. C. D. Burrows of Newport officiated, assisted by the Rev. Arnold H. Hord, of Germantown, Pa.

KAISERIN HAS TONSILLITIS. EMPEROR POTSPONES VISIT. BERLIN, Aug. 10.—Emperor William, who had planned to join Empress Augusta Victoria at Wilhelmshoebe, has halted at Potsdam.

It is officially stated that the emperor has postponed his trip to Wilhelmshoebe because of the illness of the empress. Presumably this is on account of the danger of infection. The illness of her majesty, which was at first described as a heart attack, has resulted in a feverish inflammation of the tonsils, it is not considered dangerous, but the empress is confined to her room, and her physicians have ordered perfect quiet for her.

ADMIRAL WITH FLEET. OF ONE SHIP DETACHED. WASHINGTON, Aug. 10.—An admiral with a fleet of one vessel apparently does not meet the views of the navy department, which issued an order detaching Rear Admiral Sidney A. Stanton from command of the fifth division of the Atlantic fleet and assigned him to duty on the general board August 16.

The vessels of the fifth division have become scattered all over the Atlantic on special duty until finally Admiral Stanton had only one vessel under his direct orders.

ED AUSTIN BURIED;
OLD TIME MINER

Funeral Takes Place Yesterday at Cananea; Relatives in Bisbee

(Special to The Review.)

CANANEA, Son., Mex., Aug. 10.—Ed Austin, one of the old timers of the southwest, who has made Cananea his home for the past year or two, died this week at the company hospital after a short illness with dysentery. Mr. Austin was 70 years old and was born in New York state. When but a young man he came west and was a familiar character about Bisbee, Tombstone and other camps in Arizona. He was associated with L. C. Shattuck in a number of Sonora mining properties and had located many a valuable property in Arizona and Sonora during his career as a prospector.

His relatives have not been heard from and the funeral took place this afternoon at 2 o'clock and the remains were accompanied to their last resting place by a large number of friends. He is known to have had a niece and nephew in Bisbee, but it is not known whether they live there or not at present. He also had relatives in New York but none could be communicated with.

The Cananea club will have a solo tournament on Saturday night, August 19.

Gqn. J. P. Lomelin went to Hermosillo on Wednesday on official business, to be absent for the remainder of the week.

Manager Edw. L. Dufourcq of the Chispa mine is at present at the property.

Wm Leggett left yesterday for San Francisco, where he goes as a delegate to the Eagles' convention as a representative of the Cananea mine.

KINDLES FIRE WITH \$50. MIDDLETON, N. Y., Aug. 10.—After using scraps of paper to kindle a fire in the kitchen stove, Mrs. H. C. Mason of Union Grove discovered that she had thrown into the flames three \$10 bills and one \$20 bill. She rescued the charred fragments, which she sent to the treasury department at Washington for redemption.
